

DAHLE GUILLOTINES

PROFESSIONAL SERIES - LARGE FORMAT

Not all projects can be cut on standard size trimmers. For these large format applications, Dahle has created a professional line of Large Format Guillotines. These commercial grade cutters are designed to cut large amounts of paper with your safety in mind. This series has built in features that will make your cutting task a safe and pleasurable experience.

Dahle's Professional Series large format guillotines offer a metal fan guard to prevent injury by keeping hands from being in the wrong place. The ground, self sharpening cutting blade is made of German Solingen steel and maintains

a perfectly honed edge every time it is used. A manual clamping system holds work securely and a lockable backstop can be mounted on either end of the cutting table.

Dahle Specialty Cutting Tools are manufactured in Germany and are available in 30", 36" and 42" cutting lengths. They can be found in art departments, custom frame shops, and print & copy centers throughout the world.
